AVAILABILITY OF REPRINTS AND PUBLICATIONS

Wildlife Review does not distribute any of the papers abstracted herein, nor can the editor of Wildlife Review undertake to obtain copies of these papers for anyone. A reprint of an article published in a journal may be available from the author, from the organization with which the author is affiliated, or from the publisher of the journal in which the article appeared. When an author's address is known, it is shown in square brackets following the citation. Addresses of most wildlife organizations can be obtained from the Conservation Directory, an annual publication available from the National Wildlife Federation, 1412 16th Street, N.W., Washington, D.C. 20036, at a price of $2.50 a copy. This directory lists more than 900 agencies and organizations concerned with natural resource use.

WILDLIFE--NATURE PROTECTION & RARE & EXTINCT SPECIES

Cox, James A. THE ENDANGERED ONES. Crown Publ., Inc. (New York) 224p., 8 X 10.5 in. 1975. Price $14.95. WR 159: 3

"The world lost an average of two animal species every hundred years of the Christian era; after that the pace began to mount rapidly, so that our record in this century works out to one species destroyed every year." The fate of the approximately 400 endangered species or subspecies of birds, mammals, reptiles and fishes selected from the Red Data Book is the concern of this well-illustrated book. A profile of each animal, its habitat, and its current status with reasons for its decline and proposals for its survival are included. The arrangement is geographical--continent by continent--including chapters on oceanic islands and oceans.

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.
